# CR-2 PLUS AF

## SEE PRECISELY WHAT YOU'VE BEEN MISSING

### INTEGRATED TECHNOLOGY

The Canon CR-2 PLUS AF Digital Retinal Camera is designed to help you consistently capture and analyze truly superb images—quickly, efficiently, and automatically. Designed around the legendary Canon EOS optics and advanced CMOS image capture technology, the CR-2 PLUS AF Digital Retinal Camera provides a remarkable set of advanced features specifically designed to enhance, capture, and analyze all fundus images.

### DEDICATED DIGITAL CAMERA

Canon is the only brand offering a digital fundus camera that incorporates its own premium front lens, internal camera lenses, and CMOS camera sensor. The result is less chromatic distortion and spherical aberration. This, in turn, allows the camera to provide excellent color reproduction and

extraordinary image detail. Reds, greens, and blues all remain just as Canon intended. And, because the optical pathway is entirely manufactured by Canon and free of aberration, the CR-2 PLUS AF's digital filter set is able to provide very precise and consistent views of the various layers of the retina.

### ULTRA-HIGH-RESOLUTION FUNDUS IMAGE

The CR-2 PLUS AF Digital Retinal Camera delivers stunning, high-resolution images—among the highest resolution available in any digital retinal camera today—with extraordinary speed, detail, contrast, and color fidelity.

EASY-TO-MANAGE  
CONTROLS RIGHT AT  
YOUR FINGERTIPS

# HELP MAKE YOUR PRACTICE MORE EFFICIENT

The Canon CR-2 PLUS AF Digital Retinal Camera is extremely flexible and comes with a comprehensive set of standard features designed to help you quickly capture and analyze data. Some of the camera's more notable features include:

## AUTOFLUORESCENCE (FAF)

At the touch of a button, the CR-2 PLUS AF provides instant access to this valuable diagnostic tool, enabling you to document changes in the Retinal Pigment Epithelium (RPE).

## AUTO-FOCUS WITH MANUAL ALIGNMENT OVERRIDE

Automatically focus the eye by partially depressing the joystick, or easily switch to manual focus with a twist of the focus ring.

## AUTO-CAPTURE

Automatically captures the image once the eye is properly focused.

## AUTO-EXPOSURE

Automatically measures the volume of infrared light at the retina and adjusts the flash intensity.

## AUTO-FUNDUS

Automatically switches from the external eye to retinal observation mode when the eye is properly aligned.

## IMAGE ERROR DETECTION

Advanced software automatically confirms both correct alignment and focus.

## QUICK PREVIEW

Preview image directly on the dedicated EOS camera immediately after the image is captured.

## LOW FLASH INTENSITY

Low flash increases patient comfort and reduces miosis for a faster exam. The CR-2 PLUS AF supports a wide range of low ISO speeds, including ISO 200/400/800/1600/3200/6400.

Auto Focus Error

Correct Focus

## SEE LIPOFUSCIN BUILD-UP AT AN EARLY STAGE

In the non-mydratic FAF mode, the CR-2 PLUS AF Digital Retinal Camera enables you to assess and monitor the condition of the Retinal Pigment Epithelium (RPE). The camera's infrared alignment light allows patients with pupils as small as 3.3 mm to be easily photographed without dilation drops. FAF is especially

effective in identifying and monitoring subtle changes in the areas of lipofusion, even before there's structural change or vision is affected. These changes may be pre-cursors to vision problems, such as diabetic retinopathy, age-related macular degeneration, glaucoma, and geographic atrophy, among others.

# COUNT ON EXTENSIVE DIGITAL FILTER PROCESSING CAPABILITIES

The CR-2 PLUS AF Digital Retinal Camera produces ultra-high-resolution, wide-angle views with excellent color, detail, and contrast. To further enhance your retinal exam

capabilities, the camera has a full set of blue, green, and red digital processing modes to extract more in-depth information from each image.

## CHANNEL MODES

### BLUE

Excellent views of the retinal nerve fiber layer, internal limiting membrane, retina folds, cysts, and epiretinal membranes.

### RED

Useful for pigmentary disturbances, choroidal ruptures, choroidal nevi, and choroidal melanomas.

### COLOR

Brilliant, full-spectrum images with superior detail and color accuracy.

### GREEN

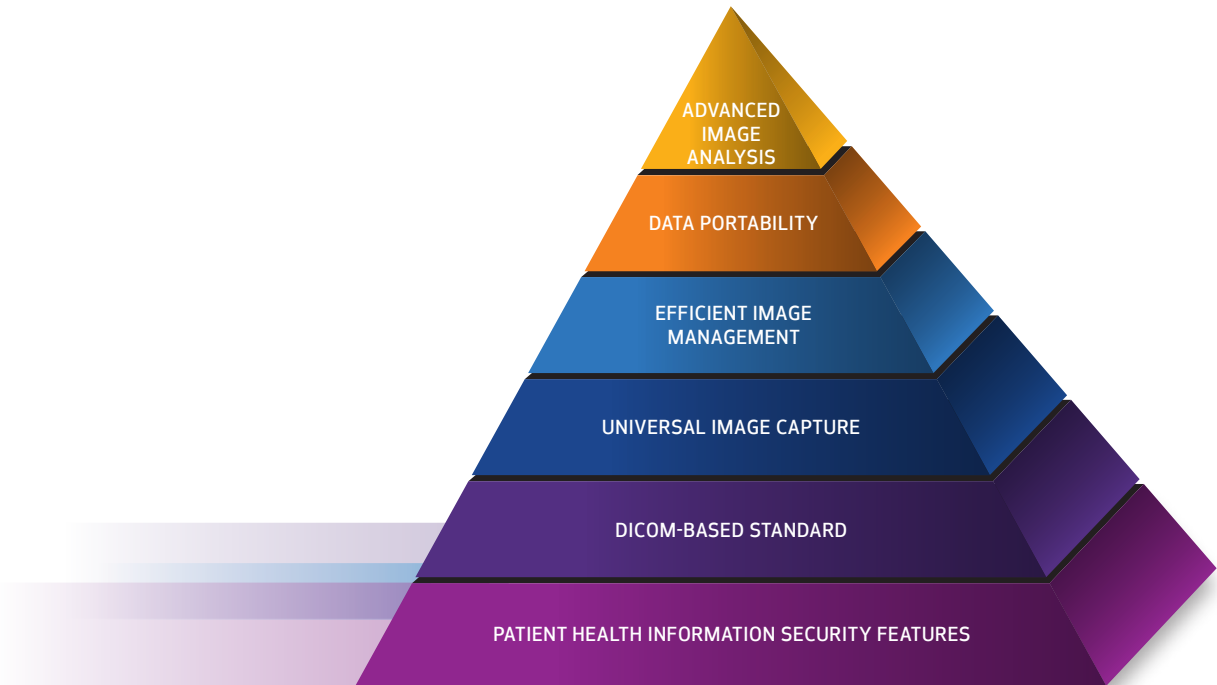

Enhances the view of the retinal vasculature and highlights common findings such as hemorrhages, drusen, and exudates.

### RED-FREE

Used for evaluating the Retinal Nerve Fiber Layer (RNFL) and the vascular structure of the retina as it relates to glaucoma, diabetic retinopathy, and hypertension.

## imageSPECTRUM IMAGE MANAGEMENT SOFTWARE

### ADVANCED IMAGE ANALYSIS

Use Advanced Tools to help quantify progression; overlay and merge images to clearly see and assess changes; add notes to help document and annotate.

### DATA PORTABILITY

Provides for the secure transmission of patient data to referring physicians and other coordinated care partners.

### EFFICIENT IMAGE MANAGEMENT

This is not an EMR. It's software specifically designed to enhance practice workflow and productivity through the efficient viewing, query, analysis, storage, and sharing of completed images and studies, whether in the next room or across the country.▲

### UNIVERSAL IMAGE CAPTURE

Bluetooth wireless encryption allows images and reports from third-party legacy instruments to be easily integrated for secure, single-patient record access.▲

### DICOM-BASED STANDARD

Universal standard easily integrates with your diagnostic imaging and measurement devices from Canon and most other eye equipment manufacturers.▲

### PATIENT HEALTH INFORMATION SECURITY FEATURES

Uniquely equipped with advanced security features, such as Aging Password, Role-based Access, 256K Encryption, Audit Log Recordkeeping, Patient Reconciliation, Auto Log-off, Automatic Archival Solution, and more.

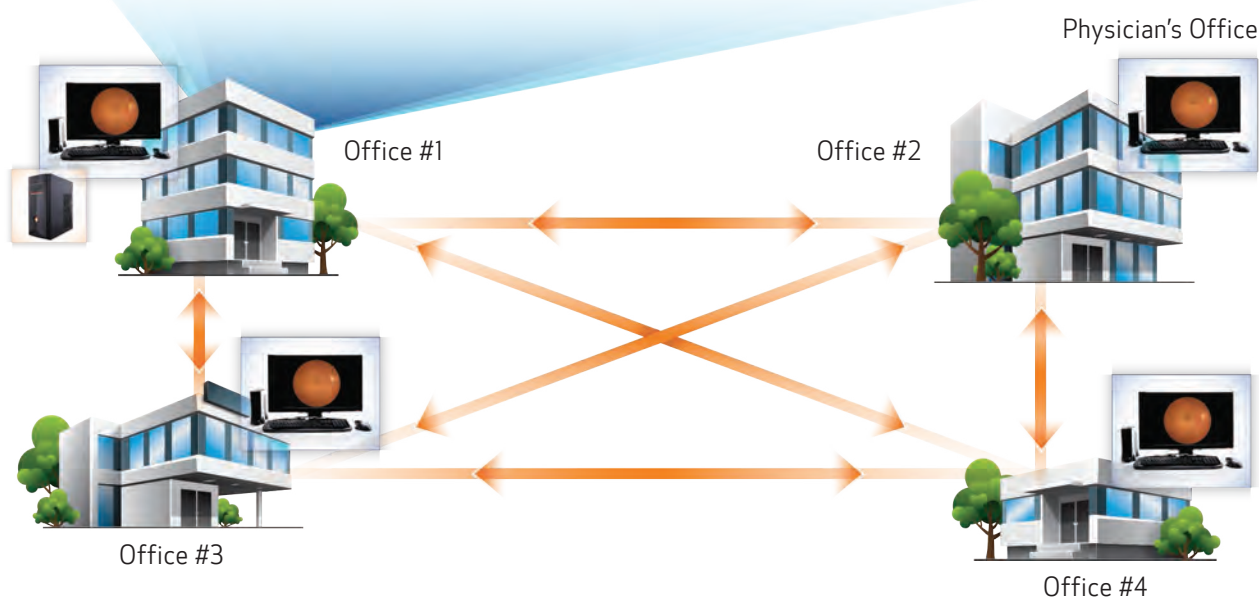

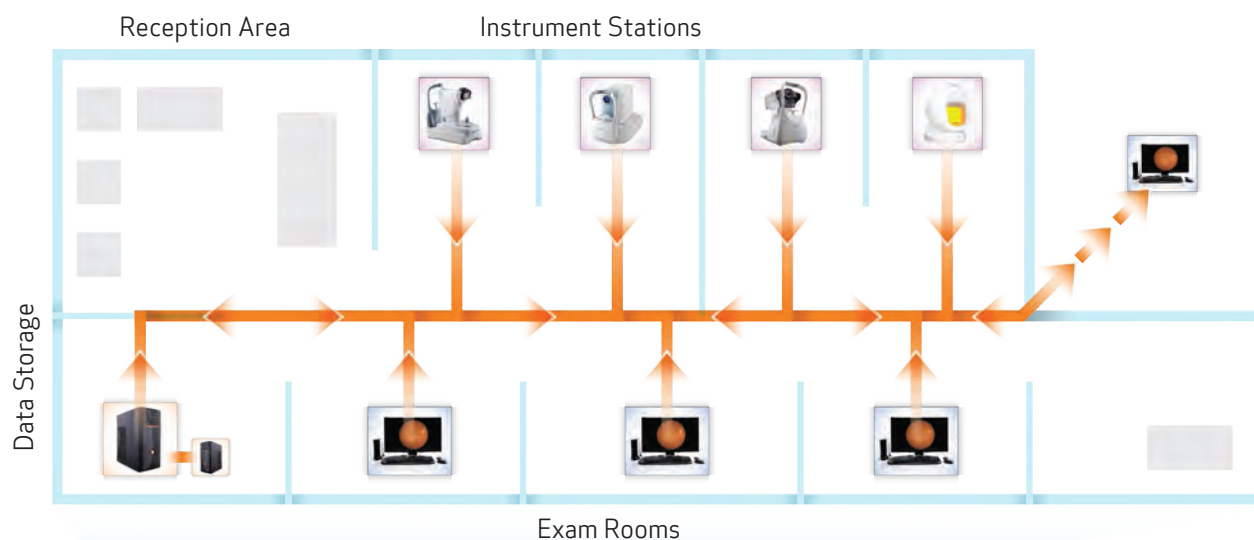

BEYOND THE EMR:  
HOW TO BUILD  
SECURE PEACE  
OF MIND

▲ Instruments must have print-to-file capability and either an RS-232 or USB port.

# imageSPECTRUM FITS EASILY INTO NEARLY ANY BUSINESS ENVIRONMENT

imageSPECTRUM can be easily configured to support virtually any practice network, small or large. Designed with your growing practice in mind, this system is readily scalable. This means that imageSPECTRUM can support not only the needs of your current practice, but also easily expand as your practice grows or your needs change.

## DIGITAL NON-MYDRIATIC RETINA CAMERA

### Specifications

#### General

**Type:** Digital Retinal Camera, Non-Mydriatic

**Type of Photography**

Color, Digital Red-free, Digital Cobalt, Fundus AutoFluorescence (FAF)

**Angle of View:** 45° (35° SP Mode)

**Magnification:** 2x Digital

**Minimal Pupil Size:** 4.0 mm (3.3 mm SP mode)

**Focus Adjustment Type:** Split-Line Adjustment

**Patient Diopter Compensation Range**

Without Compensation Lens: -10 D to +15 D

With "-" Compensation Lens: -31 D to -7 D

With "+" Compensation Lens: +11 D to +33 D

**Light Source**

Observation: LED

Photography: Xenon Tube

**Canthus Mark:** 420 mm From Base

**Internal Eye Fixation:** LED Dot Matrix

**External Eye Fixation:** White LED (Sold Separately)

**Working Distance:** 35 mm

**Working Distance Adjustment**

Anterior Observation: Double Image Match Method

Fundus Observation: Working Distance Dots

**Sensor Resolution:** 18.0 megapixels or more

**Camera**

Dedicated EOS Camera for CR-2 PLUS AF (Bundled)

**Monitor**

3.0-inch Color LCD Monitor

External Monitor (Optional)

**Auto Function:** Automatic Exposure

**Mount Movement**

Front and Back: 70 mm

Side to Side: 100 mm

Up and Down: 30 mm

**Chin Rest Movement:** 60 mm

#### Electrical and Environmental

**PC Interface:** USB 1.1, USB 2.0

**Power Supply:** AC 100-240 V, 50/60 Hz

**Operating Environment**

Temperature: 50° to 86° Fahrenheit (10° to 35° Celsius)

Humidity: 30% to 90% RH (No Condensation)

Atmospheric Pressure: 700 to 1060 hPa

#### Physical Characteristics

**Dimensions** (H x W x D)

20.2" x 12" x 19.7" (513 mm x 305 mm x 500 mm)

**Weight:** 43.9 lb. (19.9 kg)

#### POST SALE SERVICE AND SUPPORT

### MAINTAINING YOUR INVESTMENT IN EXCELLENCE.

The CR-2 PLUS AF Digital Non-Mydriatic Retinal Camera is backed by Canon, a global microprocessor-based company with 75 years of optical experience. Its superb customer service and support organization is ready to answer your needs 24/7/365.

This common sense approach to service allows you to purchase a service plan that suits your specific needs—and your budget. The Canon service program may help you avoid costly instrument downtime while also helping you with the accessibility of your vital patient images and information.

To schedule a demo or for additional information,
